The New Caregiver Tools

ALEXA FOR CAREGIVING

Freedom & Peace of Mind for You.

Discover everything you're going to love about a smart virtual assistant like Amazon Alexa. Become a Technology Enabled Caregiver with the latest tools and automated solutions to increase engagement and communication, reduce isolation, and increase fun daily with amazing voice skills from Alexa.

Play Music, News, or Audiobooks for entertainment.

Easily make & receive Phone Calls & Messages

Try riddles & games to keep minds sharp!

Call for help with just your voice.

What is "Companion Call for Help"?

Companion - Call for Help is a voice-activated medical alert that works from anywhere in your home instantly connecting you to our Urgent Response Center 24/7 with just the sound of your voice. Simply say, "Alexa, Call for Help" and be instantly connected by two-way voice to a highly-trained agent. (patient-pending)

Companion is 3X faster and 83% more reliable: Most medical alert pendants or panic buttons of any type must be recharged and subscribers often forget or refuse to wear them consistently. 83% of subscribers did not have their wearable panic button on, or within reach, during a sudden illness or fall.

COMPANION CALL FOR HELP

Partner with **Companion Call for Help**

We Believe: Communication doesn't have to become more challenging with age; we may just need a different approach. With families living busier lives, in-home caregivers play an essential role by delivering dependable care and improving the quality of life to our loved ones.

Partnering with Constant Companion is easy to do.

Add 24/7 urgent response monitoring for all of your clients with our proven voice first technology and provide greater independence and peace of mind.

To learn more visit us online or call us anytime and find out how simple it is.

Live Daily Check-In Calls

Daily check-in calls with automatic updates to family and caregiver(s)

Schedule a check-in call each day, at a convenient time, and an automated update will be sent via email or SMS text message to adult children, caregivers or any authorized recipient that the client approves.

HOW IT WORKS...

Customer Care will make a personal daily check-in call at a preset time.

We ensure that all is well or find out if there is an issue.

We forward that information to the caregiver and their families as requested.

THE BENEFITS?
Increased independence and peace of mind for family

"Good Morning Mary! This is your daily check-in call. How are you today?"
