**DiaXsys**

Solutions Driving Healthier Outcomes

Overview for Visiting Angels Client:

DiaXsys is a tablet-based, easy to use application that records and stores important health related information. The tool is focused on **health management** and **medication adherence.** The data collection and analytics are designed to help users manage their health and improve their quality of life.
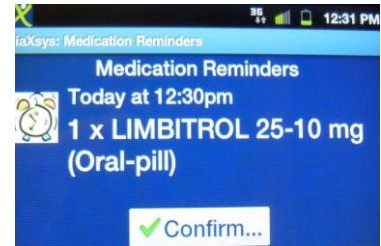

Services:

➢ Tablet-based, easy to use consumer application

➢ *24/7 real-time* monitoring of blood glucose levels, food intake, medication, exercise, and patient well-being with pictures and detailed information

➢ Reminders are sent to the client when data is not entered

➢ Alerts and notifications about important events are sent to clients and family members

➢ Automated reporting with detailed analysis for healthcare providers

➢ Real-time access to *partner services*

Patient Locator: 23 Jun 2010

It is important to take prescribed medication *consistently* and *on time*.

DiaXsys offers capabilities for creating a client medication profile that includes the type of medications and the schedule for taking them.

➢ Description of what drug to take, including comments and picture if available

➢ Flexibility in specifying schedule (times of day, etc)

➢ Ability to share information easily with family members

➢ Provides notifications and alerts when regimen is not followed

➢ Gives clients and family members better control of health regimens and helps avoid potentially dangerous situations

➢ Potential tie-in with pharmacy by way of Skype calls
